To whom it may concern:

I just want to take this opportunity to express our satisfaction with the painless installation of our new surveillance cameras, and your crew for their professionalism during the installation. Your crew was able to work around the dealership and able to do the installation without us having to encounter any video down time or lost business. They were also able to work with minimal supervision and handle any surprises that had arose during the process. Your crew has a very thorough knowledge of the equipment and made some effective suggestions on the best way to use and utilize the system.

Sincerely,
